– SUMMARY –

Game Design and Development student specializing in rapid prototyping seeking a 6-month Game Developer or Game Designer internship. Experienced building Unity, Unreal Engine 5, and Godot projects ranging from VR experiences to gameplay prototypes. Passionate about gameplay programming, rapid iteration, and creating polished player experiences.

– EDUCATION –

Technical Degree in Video Game Design and Development

Hussein Technical University (HTU) | Amman, Jordan

Oct. 2024 – Sep. 2027

- **GPA:** 3.61 / 4.00

– TECHNICAL PROJECTS –

Maybe | Unity & C# (VR Project)

- Programmed and debugged core C# gameplay mechanics for a completed, 15 minute psychological memory-based VR interactive game, built entirely within a 5-day period.
- Utilized Unity XR toolkits to implement immersive spatial player interactions and experiences.

Dogs Up! | Unreal Engine 5

- Designed and developed a playable culinary management prototype using Unreal Engine 5 Blueprint scripting.
- Implemented AI customer behaviors, navigation meshes, custom UI timers, and responsive game states.
- Conducted thorough playtesting and balancing iterations to ensure smooth game loops.

Platformer Game Jam Entry | Godot & GDScript

- Won 3rd place in a local competitive game jam.
- Delivered a playable game build within a 3 day deadline.

– LEADERSHIP EXPERIENCE –

Event Manager – Game Development & VR Club

Hussein Technical University

Nov. 2025 – Present

- Organized workshops discussing various game engines, game jams, and game nights.
- Coordinated with faculty and student teams to grow club participation.

– WORK EXPERIENCE –

Intern Quality Assurance Engineer

Nextwo | Amman, Jordan

Apr. 2026 – Jun. 2026

- Applied software QA methodologies, executing functional, regression, and usability testing workflows.
- Developed communication and conflict resolution skills through the Agile/Scrum framework.

– VOLUNTEER EXPERIENCE –

The Children's Museum Jordan

Amman, Jordan

Apr. 2025 – Sept. 2025

- Facilitated interactive and entertaining exhibits for children, gaining recognition from senior management for excellent composure, communication, and high adaptability under high-energy conditions.
- Trusted by museum coordinators to assist in supervising crowds and activities for large-scale public events.

– SKILLS & LANGUAGES –

- **Technical Skills:** Unity, Unreal Engine 5, Godot Engine
- **Programming Languages:** C#, C, Java, GDScript
- **Soft Skills:** Presentation & Public Speaking, Quick Adaptability, Detail-Oriented Work Quality, Teaching
- **Languages:** Arabic (Native), English (Full Professional Fluency)
